Norrtälje, November 3, 2022

Company statement regarding: the EU directive 2011/65/EU (RoHS2) the EU REACH regulation (SVHC 224 of June 6th, 2022)

From mid June 2005, all soldering at Lundahl Transformers are carried out with lead-free solder.

We have also ensured from our suppliers that all materials used in production of our transformers are RoHS-compliant. Thus, all transformers manufactured after July 1, 2005 are RoHS compliant.

All Lundahl RoHS-compliant transformers are market with an encircled "F" on the label, except in some very rare cases (e.g. LL6404, LL1572, LL1574....) where the label is too small to accommodate anything but the type number.

In our products or production process, no substances listed in the above REACH regulation are used.
